1. [Modulo Demo 2](#)

Modulo Demo 2

Ejemplo 1

Este es un ejemplo

Begin by clicking on the section title and entering your own. Next, type the module text. Use styles such as CNXML Term, CNXML Code, CNXML Emphasis, and CNXML Link to style the body text of your document. Feel free to use built in styles such as Heading 1, Heading 2, to mark up the document sections. These headings will be used to create sections in your module. Using the CNXML styles in conjunction with some of the built in word styles will make it much easier to convert your Word document into CNXML.

Note: You will need to highlight and delete all unnecessary text including the section title and paragraph directly above, before uploading your module.

To save changes to this template for future use, choose Save As from the File menu. In the Save As Type box, choose Document Template. Next time you want to use it, choose New from the File menu, and then double-click your template.
